Subject: FW: are you all looped in with OAR/Indoor Air on the radiation sampling at West Lake -- Spanish Village? thanks ng

Lee/Sara,

Let me give you a quick summary of some field work R7 conducted this week in St. Louis. Recently a nearby resident of West Lake and Bridgeton Landfills filed a lawsuit against the landfill alleging some radioactive contamination inside their home. We have not been able to get detailed information except a summary table that indicated Th230 in a dust sample. Without being provided more information we pursued the development of a QAPP for residential sampling and worked with USACE, ERT and MO DNR and DHSS for their input. Myself and Dave Kappelman provided Superfund with assistance during the field work this week during which two nearby homes were surveyed. Soil, swipe and dust samples still need to be tested by a laboratory, but per the QAPP there was not a need to take biased samples based on screening results. Reports to the homeowners are expected in a few months.

Let me know if you have any specific questions, but our website is pretty update with the latest happenings.

Happy New Year,

-Chuck

As we discussed. Please make contact with Headquarters so they are aware. Once completed please contact BW and let her know we closed the loop.

Chuck Hooper is our regional ORIA rep and obviously was heavily involved in the creation of the QAPP. If the question is whether we consulted with HQ OAR personnel, the answer is no.

Keep in mind, that the only air monitoring that we are doing is short duration radon monitoring.

Let me know if there are any other questions.

Tom
